

Neelikon test

Doc No: s-103 | Rev: 3 | Date: 12/12/2025

prepare a prototype (flow + structure) for a Document Management System (DMS) based on your detailed workflow (Creator Approver Issuer Controlled Access). -System Flow Chart (process steps) -Module-wise Functionality (dashboard, upload, approval, issuance, access control)-Database Design (sample schema)-User Role Permissions-Technology suggestion for development

Creator Login
Fill Doc Info (ag fields)
Upload Word Doc (No header/footer)
Send to Approver (Notify)
Approver reviews doc (with header/footer)
Approve Document
Decline (add remark)
Add remarks,
Goes back to Creator
select sharing dept.
Send to Issuer (MR)
Issuer reviews doc (header/footer)
Issue Final Copy
Decline (add remark)
Add Issue remark
Goes back to Creator
Convert to PDF (Final)
Auto Notify All Users
Assign Control Copy NosUsers View/Print Controlled PDF only (No download, traceable by User

ID)-----Responsibility: Module-Wise
Functional Prototype PlanRoleFeaturesCreatorCreate new document entry, upload Word doc, view pending/returned docs, resubmitApproverView pending approvals, open doc (auto header/footer), approve/reject, add remarks, assign departmentsIssuer (MR)View approved docs, issue/reject, add final remark, track issued documentsUser/RecipientView issued documents (PDF only), print with control footerAdminManage users, roles, departments, track logs, export reportsThere is some conditions: -Auto reminders for revision (based on due period)-Comparison tool (old vs. revised doc)-Version history tracking-Export to Excel logs (per user or document)-QR code footer for

authenticity-----About Database table
